

Regional Bicycle Travel Demand Model Phase II Stakeholder Meeting

Tuesday May 14th, 2013 1-3pm
UC MBEST Center 3180 Imjin Road, # 101, Marina, CA

Funded by the Monterey Bay Unified Air Pollution Control District's AB 2766 Emission Reduction Grant Program, the Regional Bicycle Travel Demand Modeling Project will assist the Air District and local planners in conducting benefit-cost analyses of bicycle projects while assisting AMBAG with meeting SB 375 mandated regional GHG targets.

Phase I of the project is nearing completion, with a functional modeling tool delivered by the consultant. As work begins on Phase II, stakeholder input is sought to help guide the delivery of the final modeling tool. Consultants from Parsons Brinckerhoff will be on hand to demonstrate the functionality of the Bike Modeling tool, give an overview of Phase I of the project, and layout the process for moving forward with Phase II.

This meeting will also be available online as a GoTo Meeting:

1. To join meeting.

<https://www1.gotomeeting.com/join/853211449>

2. Use your microphone and speakers (VoIP) - a headset is recommended. Or, call in using your telephone.

United States: +1 (646) 982-0002

Access Code: 853-211-449

Audio PIN: Shown after joining the meeting
